Heating Performance You Can Count On!

We build quality into every component of our Amana® brand products. And our **Amana® Distinctions™ brand 80% AFUE Gas Furnace** is a prime example of this attention to detail. This high-quality furnace, which can save you up to 25% on your heating bills versus many older units, will heat your home to a steady, comfortable temperature for years to come.

Quality that is Built to Last

The **Amana® Distinctions™ brand 80% AFUE Gas Furnace** is built with a long-lasting, heavy-duty aluminized-steel tubular heat exchanger that has been tested to the highest industry standards. The unit has an energy-saving Hot Surface Ignition system that features a Norton Mini-Igniter with a patented adaptive learning algorithm that helps maximize igniter life.

Quality You've Come to Expect

Your **Amana® Distinctions™ brand 80% AFUE Gas Furnace** provides you with the following features:

- Quiet, energy-saving PSC multi-speed, direct-drive blower motor
- Quiet, corrosion-resistant, induced-draft blower assembly
- Heavy-gauge, reinforced, fully insulated steel cabinet with durable, baked-enamel, Architectural Gray paint finish

Additionally, this furnace is designed to minimize NOx emissions, contributing to better air quality inside and outside your home.

Guaranteed Comfort

Your **Amana® Distinctions™ brand 80% AFUE Gas Furnace** is protected by the one of the best warranties in the industry:

- A Lifetime Limited Warranty on the heat exchanger for the original, registered homeowner*
- A 10-Year Unit Replacement Limited Warranty on the heat exchanger for the original, registered homeowner*
- A 5-Year Limited Warranty on parts

For added security, consider Amana AsureSM Extended Service Protection.

*These warranties revert to a 20-Year Limited Warranty on the heat exchanger when the original, registered owner sells the home to another person.

Average Yearly Heating Costs**

80% AFUE: \$3,198

60% AFUE: \$4,264

A new **Amana® Distinctions™ brand 80% AFUE Gas Furnace** could save you up to 25% on your heating bills when compared to older units, assuming new and previous units are sized to provide the same output capacity.

** These figures represent estimated annual operating costs of a 90,000 BTUH system at \$0.0981/KVHR and \$1.415/Therm in St. Louis, MO, and were generated using the Energy Star® savings calculator provided by the DOE and EPA. These figures are for comparison purposes only; actual costs will vary according to personal use habits, square footage, location, how the unit is installed and the construction of your home.
